AXIPACK

NEW

ViPrint™ **Pure Glass**: a PP range with transparency

To meet the strong demand for cost effective transparent materials, Axipack have developed a new wide and essential range. Its smooth two-sided finish and its three specifically developed formulations, are ideal for your projects requiring standard, optimised or even better transparency!

It is THE ideal solution for applications such as promotional cases, luxury boxes and packaging, small POS, visors against contaminated droplets protection for example.

Discover the major benefits of our three **Pure Glass G03** ranges:

pureglass ViPrint™ Our transparent and essential standard range is available from stock service in 0.50 mm and 0.80 mm, in 80 cm x 120 cm sheet size.

pureglass⁺ ViPrint™ Featuring improved transparency characteristics, available from 500 kg.

pureglassUltimate ViPrint™ The best transparency in the range, available from 500 kg.

Transparent polypropylene sheets, thickness 0.30 mm to 1.00 mm, which is characterised by its Smooth / Smooth surface glossy appearance, its weight (30% less than PVC and PET), competitively priced, with a minimum order quantity of 500 kg and its availability from our stock service in Pure Glass quality in two thicknesses (0.50 mm and 0.80 mm) and in 80 cm x 120 cm format.

Ecological, our three ranges are **100% recyclable!**

Judge for yourself the transparency of our three **ViPrint Pure Glass**, **Pure Glass+**, **Pure Glass Ultimate** products and ask the **sales department** for **samples**! (+33 3 21 61 66 66).

With ViPrint ™ Pure Glass, let's always stay at the heart of transparency!

The entire sales team is available to answer your questions.
